Your employee Rebecca Skoczylas is big mad over your vax mandate and would like you to

"stick it where the

don't shine" and she's telling other people exactly that.

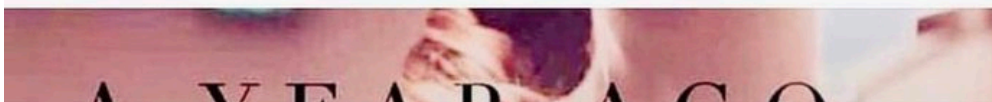

Rebecca Markin Skoczylas

Jul 15 · 🧑

When they needed me to leave my family and whisk me off to another state for 6 weeks last summer I went without question. Now I'm being told that in order to keep my job, I must have 2 UNAPPROVED injections (and all the newbies they come up with going forward) in which no animal studies have been conducted, no long term studies have been done and therefore we have no idea how this will affect those who've received it in the future. Will they cover any medical costs that arise due to a stroke, heart attack, neurological issues due to his forced injection? No. Thank you "health" care industry for showing your true colors. You can take your free donuts, free college tuition, lottery chances, free happy meals, free lap dances and all of the other free "oh so healthy" bribes and stick them where the ☀️ doesn't shine. Nov. 16, 2021

Policy Statement: Dissemination of Non-scientific and Misleading COVID-19 Information by Nurses

Purpose

To address the misinformation being disseminated about COVID-19 by nurses.

For the purposes of this statement, misinformation is defined as distorted facts, inaccurate or misleading information not grounded in the peer-reviewed scientific literature and counter to information being disseminated by the Centers for Disease Control and Prevention (CDC) and the Food and Drug Administration (FDA).

Statement

Nurses are expected to be "prepared to practice from an evidence base; promote safe, quality patient care; use clinical/critical reasoning to address simple to complex situations; assume accountability for one's own and delegated nursing care" (AACN, 2021).

SARS-CoV-2 is a potentially deadly virus. Providing misinformation to the public regarding masking, vaccines, medications and/or COVID-19 threatens public health. Misinformation, which is not grounded in science and is not supported by the CDC and FDA, can lead to illness, possibly death, and may prolong the pandemic. It is an expectation of the U.S. boards of nursing, the profession, and the public that nurses uphold the truth, the principles of the *Code of Ethics for Nurses* (ANA, 2015) and highest scientific standards when disseminating information about COVID-19 or any other health-related condition or situation.

When identifying themselves by their profession, nurses are professionally accountable for the information they provide to the public. Any nurse who violates their state nurse practice act or threatens the health and safety of the public through the dissemination of misleading or incorrect information pertaining to COVID-19, vaccines and associated treatment through verbal or written methods including social media may be disciplined by their board of nursing. Nurses are urged to recognize that dissemination of misinformation not only jeopardizes the health and well-being of the public, but may place their license and career in jeopardy as well.

"The full results show clearly that the majority of data did not fit the narrative of masks making children sick, and was not reported." Per Dr. Neuman, chair of Biological sciences @Texas A&M.

The complete results are less dramatic than what is being shared in the misleading Facebook posts, Neuman noted.

"The full results show clearly that the majority of data did not fit the narrative of masks making children sick, and was not reported," he said.

"I would conclude that this is an authentic and presumably competently-performed scientific test that is being very selectively interpreted by selecting unreliable but potentially alarming potential matches, while ignoring more confident, but non-sensical matches from the same test," Neuman said.

"The full dataset paints a very different and much less alarming picture than the data presented on the website."

Kasey Helton

@FlummoxedAunt

.

17h

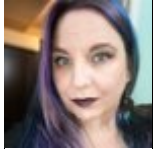

I found this article where true medical experts debunk the study in under 5 seconds. It's literally the first result that pops up when you google "Gainesville mask study."

Scientists cast doubt on findings

Experts have dismissed the results as misleading, adding that the “lab reports” were incomplete and fell short of the standards expected by the scientific community.

Physicians at [Johns Hopkins All Children's Hospital](#) reviewed the findings published on social media and concluded that they did not meet their standards for a lab report.

"The report has multiple grammatical and typographical errors, many of which we would not expect from someone familiar with microbiology or infectious diseases, and no references. We cannot confirm that any of that information is from a reputable source," spokesman H. Roy Adams told AFP Fact Check.

Kasey Helton

@FlummoxedAunt

.

17h

I looked into this article Skoczylas references from Gainesville parents. I thought as a "Clinical Documentation" expert surely this must be in reference to a serious peer reviewed

study. NOPE! It's basically a Facebook meme

Lab analysis of 'dangerous pathogens' on children's masks lack scientific credibility, experts say

Sophie Stuber, AFP France

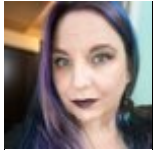

Published on 06 July 2021 at 09:55

Copyright AFP 2017-2021. All rights reserved.

Posts purporting to show alarming laboratory results from tests carried out on children's masks have been shared more than 1,300 times on Facebook by anti-lockdown groups who claim the findings are scientific evidence that masks cause harm. But experts have dismissed the reports that appeared on social media as incomplete and lacking scientific rigour, pointing out that many of the "dangerous pathogens" on the masks are commonly found on human skin.

Dec 10

Today I filed a complaint with

[@michiganLARA](#)

against

[@schoolcraftnow](#)

Nurse Educator Holly Austin, who has made a recent gig out of traveling to places where important local policy is being made about COVID and spreading antivax/antimask misinformation while touting her RN cred.

Since I initially posted on Twitter she's hidden this FB post comparing vaccinations and masking to communist China and Nazi Germany. Don't worry though, Holly - I sent that to LARA too.

[@NurseToughLove](#)

says licensing boards are really starting to crack down on your kinda BS.

Holly Quinn Austin

Nov 11 · 🌐

God bless each of our veterans today and everyday. My dad gave a LOT to this country to support our freedoms and our liberties. There are many that wish to strip us of those freedoms and liberties:

"It's just two weeks to stop the curve","Everybody needs to be vaccinated",

"Do it for those who are immunocompromised",

"Stop the spread, wear a mask!"

"Quarantine that asymptomatic child, he might just turn positive!"

"Church has to close to stop the spread"

"Restaurants and businesses must remain closed to stop the spread."

"If you're vaccinated, than you can enter."

"If you're vaccinated, than you can keep your job."

"If you're vaccinated, than you can enter a grocery store"

Our freedoms are being stripped every single moment of every single day by our government. Wake up! Soon there will be no more America to fight for. Soon there will be a two tiered class of citizens (already happening) just like our despised and disgusting history has shown us with Nazi Germany and Mao China. Each and every American who does not denounce this two tiered system will be complicit in unspeakable harm. Choose wisely.

Thank you to all of our veterans. I truly hope there is an America left to fight for, to honor, to lay ones life down for after this "mass genocide and emergency global pandemic."

Holly Quinn Austin

Nov 28 · 🌐

Let's get this straight. For all of the health care professionals I have had the privilege to work with, train, educate, mentor, or consult with:

You are NOT the judge and jury. You are a patient advocate. You are supposed to advocate for your patient and their wishes for their birthing, living, illness, and dying experience. The patient determines the course of treatment.

You do not get to withhold treatment or be harmful bc you disagree with your patients wishes.

Please stop your discriminatory, harmful, bias, and sickening judgements if you are one of those who have chosen to treat certain people based upon RACE, GENDER status, or VACCINATION status differently. You are a STAIN on my profession. Stay in your lane and advocate for each and every single patient regardless of their differences from you. I am thoroughly disgusted by what I am seeing posted from previous students, acquaintances, and friends. It is absolute discrimination and they seem VERY proud of it.

We all re-learn this every year as part of our continuing education. It's required. Holly either hasn't been in a hospital in a very long time or she's deliberately lying. Just one lie of many from her. Masks work.

Dec 9

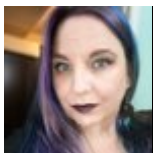

Most patients come to us with "basic precautions" requiring only a surgical mask and gloves for HCWS who enter. A patient diagnosis determines what type of precautions they are under. Droplet, Contact, Respiratory - all require different protective equipment.

Holly's statement that she has to wear all that equipment in all non-COVID rooms is a LIE. I've worked in a hospital 10 years in a non-patient care capacity. Everyone from a clerk to administration knows that precaution status is an order driven process through Drs.

If I was an institution of higher education I might be concerned what my instructors are teaching my students, especially when all of the hospitals and health department are advising the opposite. She has also been very vocal at county meetings.

Without any disciplinary action against Ms. Austin, it will be difficult to untangle Schoolcraft's culpability, albeit indirectly, with our community being put at greater risk due to the spread of misinformation by an HCW at Schoolcraft.

Community spread in Livingston County is up over 2000% (nope no extra zeros there) since July. Our local hospital is at 100% capacity. We have no mask mandate in any of our schools. Parents are still rushing to get their kids fully vaccinated.

whmi.com

COVID Surge Pushes St. Joe Livingston To The Edge

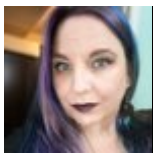

As of last Thursday, the hospital was at 100% bed occupancy, with 32 of those beds being used by patients with COVID-19. In addition, all eight of the ICU pods had COVID patients, none of whom were...

Anti-mask board members felt bolstered by testimony from so-called "health care professionals" like Holly, and as a result the motion to pass a mask mandate in Brighton schools at a special meeting where Austin spoke was denied 4-3.

In what? Pseudoscience? BTW, science isn't "opinion." And if your "teachers" are lecturing on anything other than peer reviewed science & following the scientific method it's dangerous rhetoric. Shame on you.

Nurses who spread misinformation about covid can now lose their nursing license!

#NurseTwitter

Nov. 16, 2021

Policy Statement: Dissemination of Non-scientific and Misleading COVID-19 Information by Nurses

Purpose

To address the misinformation being disseminated about COVID-19 by nurses.

For the purposes of this statement, misinformation is defined as distorted facts, inaccurate or misleading information not grounded in the peer-reviewed scientific literature and counter to information being disseminated by the Centers for Disease Control and Prevention (CDC) and the Food and Drug Administration (FDA).

Statement

Nurses are expected to be "prepared to practice from an evidence base; promote safe, quality patient care; use clinical/critical reasoning to address simple to complex situations; assume accountability for one's own and delegated nursing care" (AACN, 2021).

SARS-CoV-2 is a potentially deadly virus. Providing misinformation to the public regarding masking, vaccines, medications and/or COVID-19 threatens public health. Misinformation, which is not grounded in science and is not supported by the CDC and FDA, can lead to illness, possibly death, and may prolong the pandemic. It is an expectation of the U.S. boards of nursing, the profession, and the public that nurses uphold the truth, the principles of the *Code of Ethics for Nurses* (ANA, 2015) and highest scientific standards when disseminating information about COVID-19 or any other health-related condition or situation.

When identifying themselves by their profession, nurses are professionally accountable for the information they provide to the public. Any nurse who violates their state nurse practice act or threatens the health and safety of the public through the dissemination of misleading or incorrect information pertaining to COVID-19, vaccines and associated treatment through verbal or written methods including social media may be disciplined by their board of nursing. Nurses are urged to recognize that dissemination of misinformation not only jeopardizes the health and well-being of the public, but may place their license and career in jeopardy as well.
